EDUCATION

•MIT (Art, Design and Technology) University, Pune

2023-2027

Computer Science And Engineering

CGPA: 7.80

PROJECTS

• AgentIntel | [Link](#)

June 2026-present

An AI-powered market intelligence platform for company research, SWOT analysis, and competitor benchmarking.

- Built using React.js, Flask, LangGraph, PostgreSQL, Tavily Search, OpenRouter, and REST APIs to automate company research, competitor benchmarking, SWOT analysis, and business intelligence reporting.

• AspAI | [Link](#)

January 2026-present

An AI-powered career coach that delivers personalized career paths, skill recommendations, and growth guidance.

- Built using React.js, Next.js, Tailwind CSS, Prisma, and Gemini AI API for career guidance, resume generation, and interview preparation.

• Employee Management System | [Link](#)

July 2026-present

Java-based desktop application for employee record management.

- Developed a Java-based Employee Management System using Java, JDBC, MySQL, SQL, and the DAO pattern to implement secure CRUD operations with input validation and exception handling.

• Scraping Infrastructure Platform | [Link](#)

May 2026

Backend-focused web scraping and data pipeline platform for collecting, storing, and serving structured web data.

- Built using Python, Flask, PostgreSQL, BeautifulSoup, Docker, and REST APIs with logging, retry handling, pagination, and 210+ scraped records.

• ShopSphere | [Link](#)

April 2026-present

PostgreSQL-powered retail analytics platform focused on backend engineering and advanced SQL analytics.

- Built PostgreSQL-backed REST APIs using JOINS, aggregations, filtering, and window functions for revenue, inventory, and customer analytics.

• DevTask Pro | [Link](#)

February 2026-present

Containerized full-stack task manager with CI/CD automation for seamless build and deployment.

- Built a Flask REST API with MongoDB, Docker, and GitHub Actions to automate CI/CD and deployment.

EXPERIENCE

• FutureInterns Frontend developer intern |[Link](#)

June 2025

TECHNICAL SKILLS AND INTERESTS

Languages: C++, Python, Java, JavaScript, HTML, CSS

Frameworks & Libraries: React.js, Next.js, Flask, Tailwind CSS

Developer Tools: Git, GitHub, Visual Studio Code, Figma

DevOps & Tools: CI/CD Pipelines, GitHub Actions, Docker, Jenkins

Cloud/Databases: PostgreSQL, MySQL, MongoDB

Soft Skills: Problem Solving, Communication, Team Collaboration

Core CS: DSA, OOPs, DBMS, OS, CN

Areas of Interest: AI Engineering • Full-Stack Development • Backend Engineering

POSITIONS OF RESPONSIBILITY

• Team Lead, Codechef (MIT Programming Club)

2025

• Core Team Member, Eastern Royal Company Music Studio

2025

ACHIEVEMENTS

• Hack2Skill- Participated in the Gen AI Exchange Hackathon 2025 by Google Cloud | [Link](#)

• Certificate of Achievement: Artificial Intelligence Primer Certification, INFOSYS | [Link](#)

• CPA – C++ Certified Associate Programmer Certification, Cisco Networking Academy | [Link](#)

• Certificate for the Completion of Solutions Architecture Job Simulation, AWS | [Link](#)

CODING PROFILE

🔗 [LeetCode](#): C++ | DSA Practice | Profile
